

MEDICAL ALERT FORM

IMPORTANT MEDICAL ALERT

A connection between **Fosamax** and other bisphosphonates with a serious bone disease called Osteonecrosis of Jaw (ONJ) has been found.

Bisphosphonates are commonly used in tablet form to **prevent and treat osteoporosis** in post-menopausal women. They are also used in the **treatment of Paget’s disease**. Stronger forms given orally and intravenously (IV) are commonly used in the **management of advanced cancers** including, but not limited to, lung cancer, breast cancer, prostate cancer & multiple myeloma.

Have you taken any of the following bisphosphonates?

- | | | | | | |
|-----|----|-----------------------------|-----|----|-----------------------|
| YES | NO | Alendronate (Fosamax) | YES | NO | Raloxifene (Evista) |
| YES | NO | Clodronate (Bonafos, Ostac) | YES | NO | Risedronate (Actonal) |
| YES | NO | Etidronate (Didronel) | YES | NO | Teriparatide (Forteo) |
| YES | NO | Ibandronate (Boniva) | YES | NO | Tiludronate (Skelid) |
| YES | NO | Pamidronate (Aredia) | YES | NO | Zoledronate (Zometa) |

If **Yes**, when? _____
